## ***Mil Mi-8, Mi-9, Mi-17, Mi-171 & variants***

The Mi-8 has possibly been built in greater numbers than any other type of helicopter. The only other type that may compete is the Bell UH-1. Probably more than 15,000 Mi-8s and variants were produced by the factories at Kazan and Ulan-Ude, and the type has seen extensive service around the globe with both civil and military operators. The Kazan Helicopter Factory (KVZ) built its 7500th Mi-8 in May 2014. As for most of the exported helicopters only the 'export number' is known (while they also have a real construction number which remains unknown), these export helicopters are given separately.

The versions of the Mi-8s built by UUAPO (later UUAZ) factory at Ulan-Ude are as follows: Mi-8AT: c/n 9700101 to 9765050, 9765401 to 9765520, 9775551, 9775576 and 9775577; Mi-8TV: c/n 9765101 to 9775350 and 9785521 to 9785575; Mi-8PP: c/n 9767301 to 9807732 and 98250005 to 98250925; Mi-8TP: c/n 98841580, 98943973 to 98947302 and 99154012 to 99154258; Mi-8SMV: c/n 9767101 to 9777210, 9787801 to 9818004 and 98183210 to 98183675; Mi-9 (or Mi-8IV): c/n 9788501 to 9818838 and 98133006 to 98656918; Mi-8MGA: c/n 9815701 to 9815750, 98103103 to 98841567, 98841594 to 98943961, 99047315 to 99050993 and 99254272 to 99457768; Mi-8AMT: c/n 99489602015 to 99489607904, 99489611137 to 99489611156 and 99489614214 to 99489614258; Mi-8AMTSh: c/n 99489611121, 99489614987, 99489617314, 99489617647 and 99489617659; Mi-171: from c/n 99489610031 on.

Construction numbers on a Mi-8 are to be found inside the pneumatic system filling hatch on the left side (towards the rear), or the outside of the passenger cabin or where the tailboom is fixed to the rear fuselage. The stencilled construction number can also be found on the rear of the floor plate where the clam-shell doors meet the floor when closed (not actually on the floor, but on the 7-8 cm rim that runs between the base of the floor plate on the inside of the cabin and the outer skin on the bottom of the helicopter).

### **Mi-8 prototypes built by MVZ im. Milya (former MMZ No. 329) at Moscow-Sokolniki**

01 01	?	no reg	V-8	MAP MVZ im. Milya	f/f	24jun61	the first prototype, had one Ivchenko AI-24V engine and Mi-4 main/tail rotors; carried 'Aeroflot' titles; f/n Moscow-Tushino 09jul61
02 01	--	no reg	V-8 V-8A	MAP MVZ im. Milya MAP MVZ im. Milya	mfd f/f	nov61 02aug62	dynamic test airframe for fatigue trials; with Mi-4 main/tail rotors; converted to, see next line
01 02	--		V-8	MAP MVZ im. Milya			the second prototype, had two Izofov TV2-117A engines, a five-blade main rotor and a new tail rotor; c/n from photo; carried 'Aeroflot' titles; first 'real' flight 17sep62; crashed jan66
02 02		no code	V-8 V-8AT	MAP MVZ im. Milya MAP MVZ im. Milya	mfd	summ.63	single-engined static test airframe; see also Kazan-built c/n 0102 below !
		CCCP-06182	V-8AT	MAP MVZ im. Milya	rgd	mar63	c/n from photo; Mi-8T prototype, with Mi-8P-style rectangular windows but Mi-8T-style clamshell cargo doors with sloping hinge line; in olive drab Soviet Air Force c/s
02 03	?	CCCP-06181	V-8AP	MAP MVZ im. Milya	mfd	may64	with the same features as above and confirmed being the same helicopter; in Aeroflot c/s; reported in a Putnam book 1975
OP-3	--		Mi-171A2	MVZ im. Milya			initially in VIP (salon) version; in Aeroflot c/s; underwent the 2nd stage of joint state trials sep64/nov64; converted to passenger version by Factory No. 329 in early 1965; joint state trials with GosNII GA completed mar65; f/n LBG jun65; c/n not confirmed at LBG, but serial confirmed for this c/n; see c/ns 0604 and 3135
OP-4	--		Mi-171A2	MVZ im. Milya	Uue	07aug14	the third prototype of this version (izdelye 17121), ground test article; airframe supplied by UUAZ in 2014 on the assembly line; the fourth prototype of this version (izdelye 17121), ground test article; airframe supplied by UUAZ in 2014

### **First-generation Mi-8 built by KVZ (former Factory No. 387) at Kazan from 1965 to 1971**

From 1966 until 1970, the Mi-8 was built only by Factory No. 387 at Kazan. These helicopters had a simple four-figured construction number, starting with the number in the batch followed by the batch number. For those with a six-digit number the meaning of the first two digits is not known. It seems that batches 01 to 29 consisted of ten helicopters each while batches 31 to 62 had 20 helicopters per batch. This could bring this production run up to 940 helicopters.

01 02		not known	Mi-8	AFL/GosNII GA	f/f	26oct65	the f/f date applies to the first Mi-8 built by KVZ; used as an aerodynamics research vehicle in 1966/77; reported in "Vestnik Aviatcii i Kosmonavтики" No. 2/2001 as 'Mi-8 No. 102'; regarding the years in use, the c/n can only be 0102
02 02		CCCP-11050	Mi-8	AFL/Kremenchug FS	rgd	26sep67	in medium green c/s with light grey underside; was already used for training of East German pilots at Globino 02jun67; was used as a ground instructional airframe by the Vyborg Technical College of Civil Aviation (VATU GA) around 1976/79; canx 1982
02 03		0203	Mi-8P	MAP Kazan VPO			in orange c/s with blue cheatline and trim and 'Aeroflot' titles; used to test a French-made flotation bag system (a photo with this was on display at Zhukovski 25aug95); was reportedly converted to the first Mi-14 prototype (V-14 CCCP-11051), but see below
		CCCP-06179 no code	Mi-8P Mi-8P	MAP Kazan VPO ? Soviet Air Force	rgd Kaz	12dec91 25jun02	mfd may66 c/n 0203 visible on the tailboom; in olive drab c/s; preserved in Park Pobedy (Victory Park) at Kazan, seen jun02/aug09

### **First-generation Mi-8 with export numbers built by KVZ (former Factory No. 387) at Kazan**

All exported Mi-8s had construction numbers in the normal system. From 1967 until 1969, the helicopters were also exported with these construction numbers, but from 1970 onwards, all Mi-8s received an additional export number when they were exported by Aviaexport. Only these export numbers were given in the documentation and on the construction number plates, while the real construction numbers could also be found on some assemblies. Unfortunately, only very few tie-ups between the construction numbers and the export numbers are known, so we are forced to give these Mi-8s with just their export number.

The first three digits of the export number indicate the country. Initially special Aviaexport country codes were used, the first digit of which indicated the continent and the second and third digits the country itself. Starting in the 1990s, standard ISO 3166 country codes were used instead (but this concerns only a very small number of Mi-8Ts). The country code is followed by the sequential number of Mi-8s delivered to the respective country.

NOTE: The designation of the armed export version of the Mi-8T is not fully clear. In a listing of exported helicopters built by KVZ it was designated Mi-8T v (for vooruzhonny - armed), while it was designated Mi-8TB in East Germany, even in official documents. However, Mi-8TB cannot be found in any Soviet documents, and Mi-8T v is documented only in that export listing. After German re-unification, all Mi-8TB gunships were stripped of their armament and re-designated Mi-8B by the Federal German Armed Forces. And the Mi-8PS passenger version was re-designated Mi-8ST. Scrapping by Oder-Schrott Friedrichsthal took place at various airfields, among them Brandenburg-Briest and Cottbus.

21278	not known	Mi-8T v	Afghan Air Force	d/d	1983	armed version; the last first-generation Mi-8 delivered to Afghanistan

India received 124 Mi-8T helicopters between 1971 and 1988, 107 of which entered service with the Indian Air Force. The first 24 (Z1361 to Z1384) were delivered in 1971/72, followed by another 20 (in the Z16xx and Z18xx ranges) in 1974/75 and a final 80 (in the Z21xx, Z23xx, Z24xx and Z28xx ranges) between 1979 and 1988. The Mi-8T was officially phased out by the Indian Air Force on 17 December 2017.

Indication is up to 3000 serials will be ZM and from 3000 on ZN.

## **First-generation Mi-8 built by UUAP0 (former Factory No. 99) at Ulan-Ude-Vostochny from 1981 to 1998**

Within batch 57 (built in 1981) Ulan-Ude changed its system, thus creating another different c/n, consisting of again the 9 and the year of manufacture, but followed now by a five-digit number the meaning of which has still to be explained. The first helicopters of batch 57 (up to number 32) still had the line number included in the c/n, while for the following ones until the end of batch 57 numbers from both system can be found in documents, and only batch 58 marks the clear transition to the five-digit number system. From now on, the line number was no longer carried externally or given in documents. The line number is given here as well. This sequence contains only helicopters for civilian use! Further complicating the issue, a different number is stencilled on assemblies of the airframe than is given in the helicopter's documents and painted in the pneumatic system filling hatch. For example, construction number 98841441 has 893021 stencilled on the assemblies and 99150714 has 196019. The first digit seems to be the year of manufacture, followed by a 9 for the Mi-8T and an 8 for the Mi-9. The last four might be a kind of serial number.

### **Mi-8 specialist versions built by UUAPO (former Factory No. 99) at Ulan-Ude-Vostochny from 1977 to 1986**

For batches 76 to 88, the construction number started with a 9 and was followed by the year of manufacture, the batch number and the number in the batch. But in 1981 (starting with batch 89), Ulan-Ude changed its system, thus creating another different construction number, consisting of again the 9 and the year of manufacture, but then a five-digit number the meaning of which has still to be explained. The first c/n is probably 9 76 7101.

						the last Mi-9 built; opb military unit 62977 at Tolkai; earmarked for sale dec07 and offered for sale by the Russian privatisation agency apr08

Some export Mi-9s were delivered with an export construction number. Its starts with a three-digit code and is followed by some kind of sequential number which does not fit into the range of the Mi-8T/TV construction numbers.

After German re-unification, all German Mi-9s were stripped of their mission equipment and re-designated Mi-8A by the Federal German Armed Forces (Bundeswehr).

## **Second- and third-generation Mi-8 (Mi-17/Mi-172) with export numbers built by KVZ (former Factory No. 387) at Kazan**

All exported Mi-17s had construction numbers in the normal system, but received an additional export number when they were exported by Aviaexport or its successors. Only these export numbers were given in the documentation and on the construction number plates, while the real construction numbers could also be found on some assemblies. Unfortunately, only very few tie-ups between the construction numbers and the export numbers are known, so we are forced to give these Mi-17s with just their export number.

The first three digits of the export number indicate the country. Initially special Aviaexport country codes were used, the first digit of which indicated the continent and the second and third digits the country itself. Starting in the 1990s, standard ISO 3166 country codes were used instead. For the second- and third generation Mi-8s (Mi-17s) an M was added to the export number in case of a military helicopter or a C in case of a civil helicopter. This sequential number did not start from 1 when the new ISO 3166 country code was introduced, but continued from the highest number used with the old Aviaexport code.

According to a KVZ export listing, the two Mi-172s delivered in 2008 are c/ns 862M41 and 862M42

862M42	2507	Mi-172	Venezuelan AF	d/d	15aug08	to MYC; the export c/n looks to be out of sequence (comes between 862M19 and 862M20); VIP version; opb Grupo 4 at La Carlota; f/n La Carlota 21aug08; l/n La Carlota 25nov12
	61120	Mi-172	Venezuelan AF	ph.	01feb18	opb Grupo 4 at La Carlota; in light grey/dark green/light blue/ochre camo c/s with 'FANB' titles and the code 'TN' on the tail
862M43	1402	Mi-172	Venezuelan AF	d/d	15aug08	to MYC; the export c/n looks to be out of sequence (comes between 862M19 and 862M20); VIP version; opb Grupo 4 at La Carlota; carried 'Aviación Militar Bolivariana' titles; f/n La Carlota 21aug08; l/n La Carlota 25nov12
	61029	Mi-172	Venezuelan AF	Ovn	31jul18	opb Grupo 4 at La Carlota; in olive drab/two shades of bluish grey/greyish green/beige camo c/s with 'FANB' titles and the code 'TN' on the tail; l/n OVB 03aug18

### **Third-generation Mi-8AMT (export designation Mi-171) built by UUAPU/UUAZ at Ulan-Ude-Vostochny from 1991 to 2005**

Production of this version started around 1991. We are not yet able to explain these construction numbers. The last helicopters with numbers in this system were built after the change to the new system (see below).

It was reported that Mi-171s were to be assembled in China by the Sichuan Lantian Helicopter Company in Wuhou district (Chengdu) from 2007. There were plans to build 20 in 2008, the first aircraft having been delivered to the PLAAC at the end of 2007. However, it is not clear whether this came actually true.

### ***Third-generation Mi-8AMT (export designation Mi-171) built by UUAPU/UUAZ at Ulan-Ude-Vostochny from 2005***

Obviously, the Ulan-Ude factory started a new construction number system in 2005. These construction numbers start with the version, followed by 00 and the last two digits of the year of manufacture, the three-digit ISO 3166 country code, the batch number, the number in the batch and the letter U for Ulan-Ude (for example 171C 00 06 643 1809U). For a certain time (from line number 18-09 to line number 23-08), there was a mix in the use of this system and the previous system. From 2007 deliveries onwards the ISO 3166 country code and the year of manufacture have swapped their position. Obviously mis-used country codes are 440 of Lithuania, 784 of the UAE and 804 of Ukraine. Up to batch 72, all batches consisted of ten helicopters, while starting from batch 73, all batches consisted of 100 helicopters.

## **Mi-8MSB with conversion numbers and unknown construction numbers**

The Ukrainian engine producer Motor Sich modernises old Mi-8Ts with TV3-117VMA-SBM1V engines and some new avionics, designating the new version Mi-8MSB, where 'MSB' stands for 'Motor Sich-Boguslayev' (the CEO of Motor Sich). The manufacture date given in the documents is in fact the conversion date. All Mi-8MSBs receive conversion numbers, and their real construction numbers remain unknown in most cases. The conversion number obviously consists of MSB8 as the type, one digit for the version (1 stands for Mi-8MSB-V variant 01), one digit for the year of conversion and a four-digit sequential number.

---	HA-MOK	Mi-8MT	not known			registration used only on a rescue exercise 23may02 in the Bgkk mountains, possibly a Hungarian AF machine

India received 124 Mi-8T helicopters between 1971 and 1988, 107 of which entered service with the Indian Air Force. The first 24 (Z1361 to Z1384) were delivered in 1971/72, followed by another 20 (in the Z16xx and Z18xx ranges) in 1974/75 and a final 80 (in the Z21xx, Z23xx, Z24xx and Z28xx ranges) between 1979 and 1988. The Mi-8T was officially phased out by the Indian Air Force on 17 December 2017.

Indication is that up to the 3000 serial prefix will be ZM and from 3000 on ZN.

Peru: Based on the registration dates of L-188s OB-T-939 (rgd sep69) and OB-R-941 (rgd aug70), 633, 634 and 635 could be the three former Aeroflot Mi-8Ts in ambulance configuration which were sent by the Soviet government to Peru after the earthquake in 1970 and were donated to Peru after completion of the humanitarian mission. There are no candidates in the MGA listing, so they were probably Soviet Air Force, in fact.

---	CCCP-22800(1)	Mi-8T	Soviet AF/AFL c/s	ATA	jul70	in white c/s with red cheatline and light blue underside and trim; arrived at Lima on board of an An-22 19jul70 and ferried to Huaraz-Anta (2,773 metres asl) the same day; operated in the Callejon de Huaylas area until late aug70; donated to the Peruvian Ministry of Health after the end of the operation which passed it on to the Peruvian Air Force; see c/n 7528
---	FAP 633	Mi-8T	Peruvian Air Force			initially opb Escuadrón de Rescate Nº 832; initially in white c/s with red cheatline, light blue underside and trim and 'Fuerza Aérea del Perú' titles; repainted in red c/s with orange nose and light blue underside by early 1972; trf to Escuadrón Aéreo Nº 332 06jun72; see 633 with unknown c/n
---	OB-E-964	Mi-8T	SATCO	rgd	17aug72	c/n given as 22800 in Peruvian register, but that is the former Soviet registration; operated in support of the construction of the North-Peruvian oil pipeline; dbr 11oct74 on a flight via Chiclayo to Lima when encountered a strong thunderstorm and deviated from its route, but both engines failed and the helicopter made an auto-rotation landing on tree-tops in the upper slopes of the Amazon, all occupants survived and were rescued after walking for 15 days through the thick jungle (one of them died the next day of exhaustion and heat stroke); t/t 1,821 hours; canx only 21dec01
---	CCCP-22801(1)	Mi-8T	Soviet AF/AFL c/s			in white c/s with red cheatline and light blue underside and trim; arrived at Lima on board of an An-22 19jul70 and ferried to Huaraz-Anta (2,773 metres asl) the same day; operated in the Callejon de Huaylas area until late aug70; donated to the Peruvian Ministry of Health after the end of the operation which passed it on to the Peruvian Air Force; see c/ns 7529 and 8AMT00643177520U

---	no serial	Mi-8	Syrian Air Force	h/o	23feb20	at Marj as-Sultan; opb the presidential flight; initially in VIP c/s; repainted in camo c/s; dbr 25jan14 when was hit by a shoulder-fired SAM of the insurgents north of Aleppo and caught fire, but managed to land inside Syrian government territory
---	not known	Mi-8T	Syrian Air Force			delivered by An-124-100 RF-82034 from Ulan-Ude via Krymsk to Latakia-Hmeimim 23feb20; in ochre/greyish green camo c/s with light grey underside
---	not known	Mi-8T	Syrian Air Force			w/o 28apr81 on a flight over Lebanon, airlifting PLO troops to locations from which they could attack the Christian enclave at El Matan in the Bekaa valley, when was intercepted at Rayak and shot down by F-16A '112' of 117 Tayeset of the Israel Air Force (piloted by Lieutenant Rafi Berkovich or Rafi Raz) with its M61 cannon at 12:14 hours (this was the first ever air-to-air kill of an F-16)
---	not known	Mi-8T	Syrian Air Force			w/o 28apr81 on a flight over Lebanon, airlifting PLO troops to locations from which they could attack the Christian enclave at El Matan in the Bekaa valley, when was intercepted (probably at Rayak) and shot down by F-16A '126' of 117 Tayeset of the Israel Air Force (piloted by Dov Opher or Dubi Yoffe) with an AIM-9 air-to-air missile at 17:29 hours (this was the second ever air-to-air kill of an F-16)
---	not known	Mi-8T	Syrian Air Force			w/o 26jun12 when made a forced landing on the outskirts of Idlib and was burnt by its crew in order to prevent it falling into the hands of the insurgents
---	not known	Mi-17	Syrian Air Force			w/o 27aug12 on a patrol mission on the outskirts of Damascus when was hit by an ZU-23-2 anti-aircraft gun of the insurgents, caught fire and crashed into houses in the quarter of Qabun, all 4 crew (commander: Colonel Al Hassan Ali) killed, but no casualties on the ground
---	not known	Mi-8/17	Syrian Air Force			w/o 20sep12 on a patrol flight at a height of 3,700 metres over the Damascus suburb of Adra when collided with A320-200 YK-AKF of Syrian Arab Airlines (which was on a flight from Damascus to Latakia) due to lacking co-ordination between civil and military ATC, the main rotor of the Mi-8 clipped the upper half of the fin of the Airbus which was able to make an emergency landing at Damascus while the Mi-8 went of the control and crashed in an area held by insurgents, all 4 crew (commander: Colonel Kahtan Mahmud Ammar) killed
---	not known	Mi-17	Syrian Air Force			w/o 05oct12 on a bombing mission from al-Mezzeh against positions of insurgents in the Damascus suburb of Al-Guta Sharkia when was hit by anti-aircraft fire, all blades of the main rotor and the tail boom separated in mid-air, the fuselage crashed and burnt out, all 4 crew (commander: Colonel Bassem Nasser) killed
---	not known	Mi-17	Syrian Air Force			w/o 17oct12 on a mission against insurgents at Maarat an-Numan when was hit probably by a "Strela-2" shoulder-fired SAM and exploded in mid-air, all crew killed
---	not known	Mi-8T	Syrian Air Force			w/o 10nov12 on a supply flight for the Hamdan garrison when an engine failed and the helicopter had to make a forced landing near Abu Kamal (Deir ez-Zor district) in an area held by the insurgents, came down very hard so that the nose gear and the tailboom broke off, pilot (Colonel Nidal Esber Mansur Mansur) killed and 2 crew members taken prisoner by the insurgents; the wreck was burnt by the insurgents 12nov12
---	not known	Mi-17	Syrian Air Force			w/o 16nov12 on a patrol flight over the Damascus suburb of Al-Guta Sharkia when was shot down by the insurgents, all 5 crew (commander: Lieutenant Colonel Awad Yusuf) killed
---	not known	Mi-17	Syrian Air Force			w/o 27nov12 on an ambulance flight when was shot down by insurgents with an "Igla-1" shoulder-fired SAM, the missile hit the left engine, the crew attempted a forced landing, but a fire broke out at a height of some 150 metres and the helicopter crashed near Daret Aza, all 5 crew (captain: Colonel Huneidi Asaad Imad) and 14 passengers (injured soldiers) killed
---	not known	Mi-8	Syrian Air Force			w/o 25feb13 on a flight from Menagh when was shot down by insurgents with an FN6 shoulder-fired SAM and crashed north of Aleppo, all crew killed
---	not known	Mi-8/17	Syrian Air Force			w/o 05mar13 on a mission from Nerab air base near Aleppo when was shot down by insurgents with a shoulder-fired SAM and crashed on the eastern outskirts of Aleppo
---	not known	Mi-8/17	Syrian Air Force			reportedly w/o 14feb13 while landing at the besieged air base of Menagh in a suburb of Aleppo when was shot down by insurgents (confirmation needed)
---	not known	Mi-17	Syrian Air Force			w/o 16sep13 on a patrol flight along the Turkish border when crossed into Turkish airspace near Yayladagi by mistake, was shot down with an AAM by an F-16 of the Turkish Air Force and crashed inside Syrian territory near Yusufia some 400 metres from the border, the captain (Colonel Ibrahim Munir Sokura) managed to bail out, but landed on territory held by the insurgents and was decapitated by them
---	not known	Mi-8/17	Syrian Air Force			w/o 11jan14 while trying to bomb Deir ez-Zor air base (which was held by insurgents) with barrel bombs when was shot down by the insurgents
---	not known	Mi-8/17	Syrian Air Force			w/o 16jan14 when was shot down by insurgents, lost its tailboom and crashed at Darayya (Rif Dimashq Governorate), all 4 crew killed
---	not known	Mi-8/17	Syrian Air Force			w/o 24may15 on take-off from Kweiras when crashed due to technical problems, all 3 crew killed (Islamic State insurgents claimed to have shot the helicopter down with a SAM)
---	not known	Mi-8/17	Syrian Air Force			w/o 13jun15 on take-off from Kweiras when was shot down by Islamic State insurgents, all 3 crew killed
---	not known	Mi-8/17	Syrian Air Force			w/o 03jul16 on a mission against Islamic State insurgents in Eastern Ghouta when was shown down, all 3 crew (Brigadier General Muhammad Ayoub, Lieutenant Sohail Sagr and technician Ghadeer Assaf) killed
---	not known	Mi-17	Syrian Air Force			w/o 02jul17 on a supply mission from Qamishli to the besieged city of Deir ez-Zor when landed near the al-Assad hospital and was hit by an ATGM fired by Islamic State insurgents, all 4 crew killed
---	not known	Mi-8/17	Syrian Air Force			w/o 11sep18 when probably came down very hard at an unknown airfield and suffered severe damage (pilot: Major William Mhalla)
---	not known	Mi-8/17	Syrian Air Force			w/o on the ground at Hama during the night 17/18nov19 when reportedly a barrel bomb which was loaded into the helicopter exploded, all 3 crew (including a Lieutenant Colonel and a Major) were killed
---	not known	Mi-17	Syrian Air Force			w/o 14feb20 on a supply flight in the western countryside of Aleppo when was shot down by Turkish troops based at the observation post at Darat Azza with a FIM-92 "Stinger" shoulder-fired SAM and crashed near Ainjar (at N36.234005 E36.935553), all crew members and passengers were killed
